

COMMUNICATION

AND

LEADERSHIP

OVERVIEW

Pure and simple successful presentations package ideas in ways which lower the cost of understanding so more people can get in on what's being discussed. Put another way, successful explanations always answer the question "Why?" They help people know and understand better the idea at hand and they also lead the listener to act on the information they convey.

Why? A great explanation

OVERVIEW

Visualize a presentation as being the way you package ideas and solutions into a form which makes them more understandable. You use the elements of your explanation to build confidence in the recipient that they are in fact moving on the scale from "understanding less" to "understanding more."

OVERVIEW

3. Present

Explanations are not intended to sit on the shelf gathering dust – their real value comes when they're being used and shared. To make your explanation truly effective and productive, you will have to get the blend of media, presentation and distribution just right. The key is to mold your explanation into forms that fit your intended audience's needs like a glove. Achieve that and your explanation will soar.
